

CLIL Phonics & Inglese Dinamico present a series of 7 workshops designed to support classroom teachers from elementary to secondary levels with new ideas, materials and lesson plans to use immediately with their students. All workshops are *interactive, entertaining and dynamic*.

Improve your foundation knowledge, learn new ideas, techniques and resources that will strengthen your teaching strategies and turn your students into active learners!

The ability to process language is a prerequisite to learning content. Specifically the ability to decode, the ability to retain tricky words, the ability to sound out and blend, the ability to comprehend oral and written language, and the ability to think critically are all necessary for success in content areas.

It is our goal at the CLIL Phonics & Inglese Dinamico Weekend Workshops Series to show you how to develop these abilities to a point that our students become independent and self-correcting. Students can successfully learn content when they can read and comprehend efficiently.

8, 9, 15, 16, 22, 23, 29, 30
